Date : .....

**Terms and Conditions:**

All warranty work will be completed upon inspection and direction of a London Eco-Metal Manufacturing Inc. Quality Control Officer or other approved inspector for London Eco-Metal Manufacturing Inc. London Eco-Metal Manufacturing Inc. will take all the necessary steps to repair or replace any areas of the roofing system to the joint satisfaction of London Eco-Metal Manufacturing Inc. and the above-named warrantor.

This warranty does not include any work that deviated from London Eco-Metal Manufacturing Inc. standards as directed by the homeowner or current resident at the warranty's stated address. (Ref. WI 001)

Any unauthorized use of this product voids the warranty.

The warranty is void on any roof areas that are less than 2 ½ : 12 pitch.

The warranty does not include damages caused by snow and ice coming off the roof whether on the buyer's property or on adjoining properties.

This warranty is contingent upon a minimum amount of maintenance. Visit the website [www.londonecometal.com/docs-e-mail.htm](http://www.londonecometal.com/docs-e-mail.htm) for more information (Ref. WI 001).

The warranty does not apply to the deterioration of the surface coating, including fading, staining or discoloration caused by Abnormal Atmospheric Conditions. Abnormal Atmospheric Conditions may include, but are not limited to, ultraviolet rays, pollution, hail, exposure to salt, high pressure water spray, corrosive or harmful chemicals (whether soils, liquids or gases), animal excrements or airborne contaminants.

London Eco-Metal Manufacturing Inc. will not be held liable for lightning rods that have been removed and replaced or altered by the London Eco-Metal Manufacturing installers.

London Eco-Metal Manufacturing Inc. will not be held liable for damage caused by moisture due to heat loss, causing ice dams or condensation.

London Eco-Metal Manufacturing Inc. will not be held responsible for the growth and/or spread of mould.

London Eco-Metal Manufacturing Inc. will not be held responsible and will not warrant any extra work that is arranged between the Property Owner and the Installation Crew that is performed outside of the London Eco-Metal Manufacturing Inc. contract.

The warranty does not cover damages arising from; or owing to; the following:

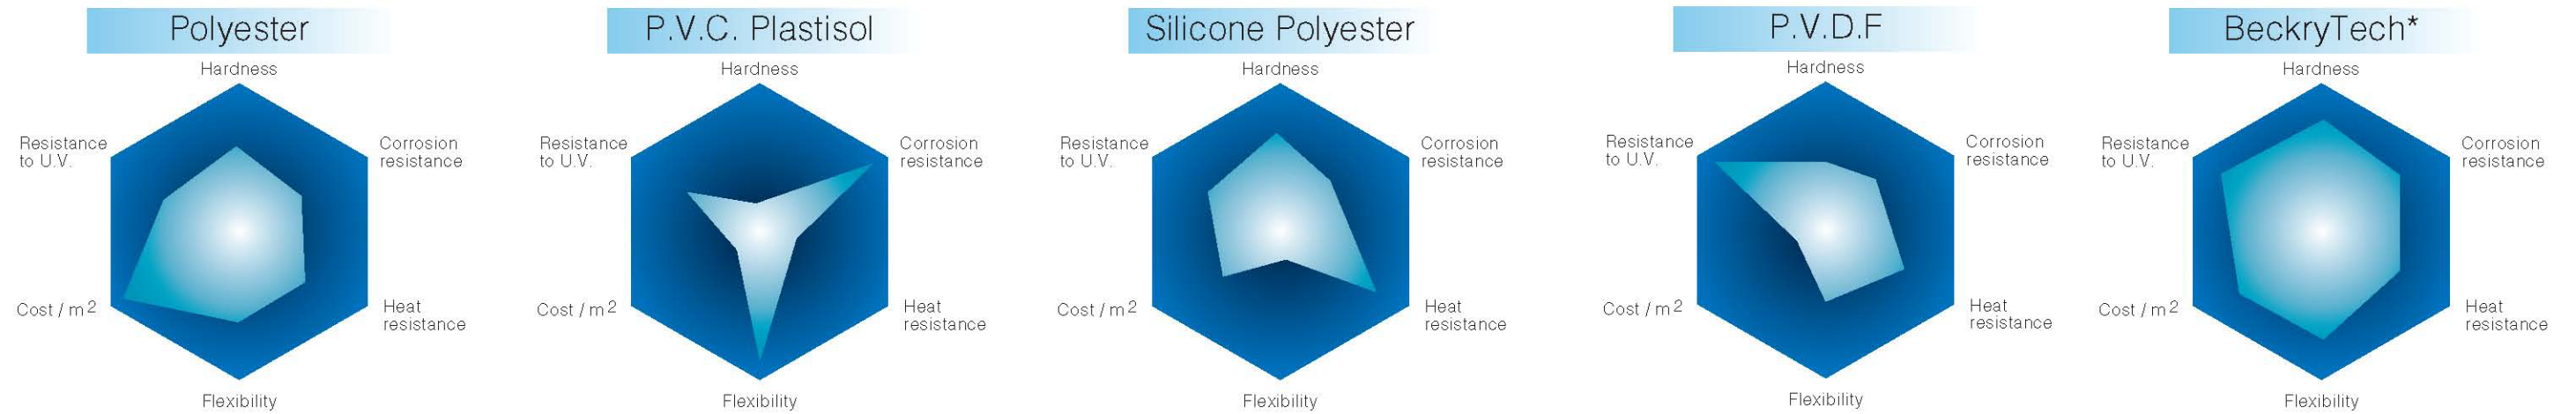

Damage due to acts of God including but not exclusive to lightning strikes, tornadoes, hurricanes, extreme hail, earthquakes etc. Miscellaneous damage including but not exclusive to, work being performed by other contractors, abuse, vandalism, fire, war and structural settling or movement.

\*10 years Warranty for labour and workmanship excludes screws, caulking, flex-o-vent, underlayment, etc.. These products are covered by the manufacturers' warranty. For more info visit London Eco-Metal Manufacturing Inc. website at [www.londonecometal.com/docs-e-mail.htm](http://www.londonecometal.com/docs-e-mail.htm) for product manufactures' warranty.

\*\* Fee for administration \$ 84.75 (\$75.00 + HST) (no inspection)

**BeckryTech\* is a complete coating system, consisting of primers and topcoats which together give a paint film with optimal characteristics.**

**With BeckryTech\* we can offer our coating partners a total solution: Uncompromising quality, uncompromising economy!**

*Restructuring for enhanced performance. Each class of coatings has its own strengths – and weaknesses. The customer/specifier has to balance product requirements with the performance characteristics of the available materials. It can be helpful to look at the profile of the range of coatings in the form of hexagonal*

*diagrams, where each six points of the hexagon represents a performance scale for one particular property. In this format, the ideal coating would be represented by the largest possible regular hexagon. The superb all round performance of the BeckryTech\* system establishes a new level of quality.*

In the world of surface coatings, technological advance pushes towards the extremes of performance: the flexibility of PVC plastisol, the UV resistance of fluorocarbons, the gloss range of polyesters, the hardness and corrosion resistance of epoxies and the cost of alkyds. The ideal coating would combine all of these qualities. In the real world we accept that this is not possible and that some degree of compromise is needed. BeckryTech\* offers an optimum balance between properties and performance.

Today's demands are for new systems offering improvements in protection and performance, while meeting the needs of environmental legislation. Our tests in Florida and elsewhere offer powerful confirmation of the level of quality shown in the diagram above. To fully benefit from the resistance of the new resin to ultraviolet light, only the most durable pigments are used.

**BeckryTech\* - uncompromising quality**
